

Circular design

Modular components are designed for complete reuse.

Glue-free upholstery

Based on sustainable, patented upholstery technology.

Complete design freedom

In terms of dimensions, upholstery and optional colour of the solid bamboo frame.

Sustainably produced in the Netherlands

Energy-neutral factory in collaboration with mostly local suppliers and products.

Design story

Do you need a little more privacy and softness for your work? For example, at flexible workspaces instead of empty office cabinets. Or more space division in the form of a flexible room divider. Or as a functional tool including a whiteboard/presentation screen.

Then the M+Planter system is definitely for you. Acoustic, modular, easy to move and can be fitted with artificial plants. Real plants are also possible, of course, but a waterproof inner tray must be used in addition.

M+PLANTER

A+ Acoustics

The M+Planter not only offers privacy for the user in the space, but also makes a significant contribution to the acoustics of the space.

Complete design freedom

Thanks to the diversity of modular dimensions, upholstery, accessories and plants, you can easily integrate your M+Planter into any interior design.

M+ PLANTER

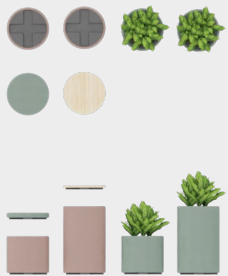

Sustainably manufactured

At our energy-neutral production site in the Netherlands and in collaboration with mostly local producers and suppliers.

Circular design

All our M+Planter configurations are composed of the modular components shown. These have been developed for complete reuse, are easy to reupholster, and a large proportion of the materials used are recycled.
